CheckPoint 360° Competency Feedback System™ Management Report

Report Prepared: May 8, 2010

CONFIDENTIAL

Survey Completed: May 5, 2010

This report includes responses from:

Self, 1 Boss, 3 Direct Reports, and 4 Peers

Profiles International, Inc.
5205 Lake Shore Dr.
Waco, TX 76710

Profiles  International
imagine great people®

The CheckPoint 360° System

The purpose of the *Checkpoint 360°* System is to identify leadership as viewed by certain groups of individuals who know and have had the opportunity to observe the manager in the work setting. This is accomplished with the collection of ratings from different sets of observers: **Self** (Sally Sample), **Boss** (you), **Direct Reports**, and **Peers**.

There are 70 leadership behaviors presented as survey items. These 70 items are grouped into 18 Skill Sets which further group into 8 Universal Management Competencies. Each rater reports their experience of observing the manager with a rating on each of the items.

In the 70 CheckPoint survey items the raters chose between six possible choices. Based on their observations they indicated the percentage of time they felt the manager displayed each behavior. The sixth choice was "No Opportunity," which was selected when the rater had no opportunity to observe the listed behavior and thus could not provide a meaningful response. These six possible responses were:

Rating	Description	Percentage of Time
1	Almost Never	0 - 10%
2	Seldom	11 - 39%
3	Sometimes	40 - 60%
4	Usually	61 - 89%
5	Almost Always	90 - 100%
N	No opportunity	to observe this behavior

There are 18 Skill Sets that are critical for success in most supervisory positions. They are grouped into 8 Universal Management Competencies. When a manager frequently displays certain behaviors which are a part of these Management Competencies, they are typically identified as effective and successful managers.

The 8 Universal Management Competencies and their 18 Skill Sets are listed below.

1. Communication

- Listens To Others
- Processes Information
- Communicates Effectively

2. Leadership

- Instills Trust
- Provides Direction
- Delegates Responsibility

3. Adaptability

- Adjusts to Circumstances
- Thinks Creatively

4. Relationships

- Builds Personal Relationships
- Facilitates Team Success

5. Task Management

- Works Efficiently
- Works Competently

6. Production

- Takes Action
- Achieves Results

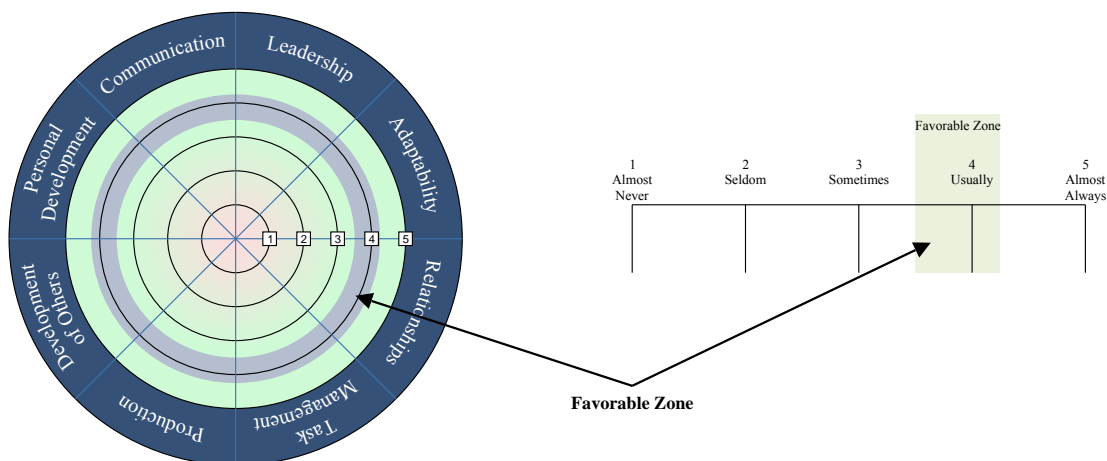

7. Development Of Others

- Cultivates Individual Talents
- Motivates Successfully

8. Personal Development

- Displays Commitment
- Seeks Improvement

Favorable Zone: The Favorable Zone was identified by analysis of the data from a wide range of industries and organizations. This analysis showed that on the *CheckPoint 360°* those managers who had been identified as "good managers" by their respective company typically achieved an average rating of 3.5 to 4.25 when rated by others who knew the manager's work behavior. This established the range of scores for the Favorable Zone on the *CheckPoint 360°*.

Introduction to the Management Report

This report summarizes the results of the CheckPoint surveys that the manager (**Sally Sample**) and the respondent groups (**Boss, Direct Reports, and Peers**) recently completed. The scores the manager received are presented in graphs and numeric scales on the pages that follow.

Feedback is reported in the following sections:

- **Executive Competency Overview**: Results for the 8 Universal Management Competencies, comparing the average **Self** (manager) score with the average score of **All Observers** (includes **Boss, Direct Reports, and Peers**) and showing whether scores fall within, above, or below the Favorable Zone. Also Total CheckPoint Scores, including the score differential between **Self** and **All Observers**.
- **Executive Skill Set Summary**: Overview of the 18 Skill Sets as rated by **All Observers**. The average ratings are displayed ranked from highest to lowest providing you an overview of the relative strengths or challenges Sally Sample may have in these Skill Sets.
- **Critical Skills Alignment Summary**: Overview of the Skill Sets identified as critical by **Boss** and/or **Self**.
- **Executive Summary**: Results for the 8 Universal Management Competencies, comparing the average scores of all respondent groups (includes **Self, Boss, Direct Reports, Peers, and All Observers**), providing Total CheckPoint Scores for each group, and pointing out group score averages that vary by 1 point or more.
- **Skill Set Analysis**: Results for the 18 Skill Sets, comparing the average scores of all respondent groups (includes **Self, Boss, Direct Reports, Peers, and All Observers**), and pointing out group score averages that vary by 1.5 points or more, as well as analyzing Critical Skill Sets to establish Talents, areas needing Focus, and areas where a significant GAP exists between **Self** and **Boss** scores. (Sally Sample and you each chose 6 Critical Skill Sets out of 18. These were considered critically important to the manager's particular job requirements.)
- **Respondent Group Comparison**: Results for the 18 Skill Sets and Total CheckPoint Scores, analyzing the average scores of each respondent group (includes **Self, Boss, Direct Reports, and Peers**).
- **Survey Summary of the 70 items**: Results for all 70 survey items, displaying the average scores for **Self, Boss, and All Observers** (includes **Boss, Direct Reports, and Peers**) and highlighting the items that fall in a Critical Skill Set, as well as flagging items where responses lack consensus (varying by three or more points) within a respondent group.

- **Development Summary Overview:** Describes the strengths and development needs Sally Sample may have for the 18 Skill Sets.
- **Coaching & Management Considerations:** Provides suggestions for using the information in the Management Report to help the manager grow and develop in the job.
- **Areas of Focus:** Describes the strengths and development needs for the 3 most critical Skill Sets and provides guidelines and suggestions for a Leadership Development plan for this manager.

As you review this material, keep in mind that most people exhibit a range of abilities. No one does everything equally well. Approached as a learning tool, this feedback can be a valuable first step toward helping the manager increase effectiveness on the job.

Executive Competency Overview

This is an overview of **Self's** rating compared to the average rating of **All Observers** (every rater except **Self**). As the **Self** (S) marker and the **All** (A) marker move away from the center of the circle, the scores are higher. Note particularly where there is a gap of 1 point or greater. This would suggest a significant difference between the manager's perception and that of the other observers as to how often Sally Sample displays that management competency.

The *Total CheckPoint Scores* reported on the smaller horizontal graph presents the average score for all 8 Competencies for both the manager (Sally Sample) and **All Observers**. If the difference between these two averages is 1 point or more, the perception the manager has of the behavior varies significantly from the other raters. This would suggest a need for a greater self awareness in the manager.

Executive Skill Set Summary

The graph below shows the average ratings of **All Observers** (ratings from everybody except **Self**) for each Skill Set. The average ratings are displayed ranked from highest to lowest providing you an overview of the relative strengths Sally Sample shows in these Skill Sets. While we suggest the manager focus on the most critical Skill Sets shown in the next section of this report, it is useful for you to have an overview of the ratings the manager received on all Skill Sets. Also, refer to the Development Summary Overview for more information.

Critical Skills Alignment Summary

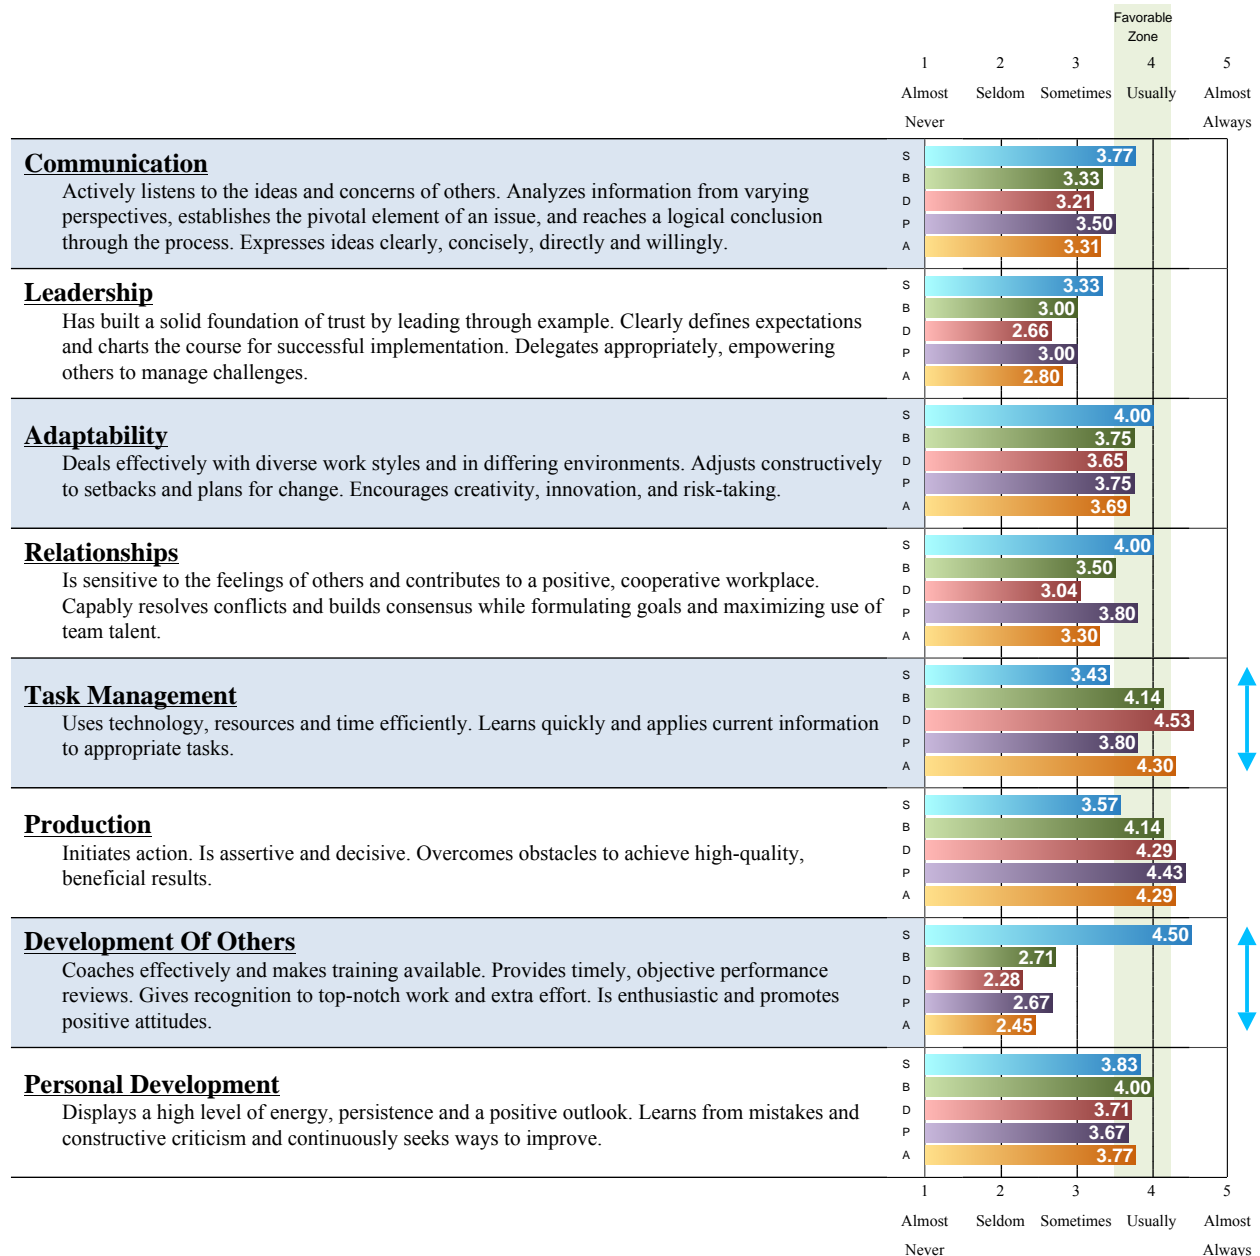

Both you and Sally Sample identified the 6 Skill Sets that you each thought were most critical for success in the manager's job. These Skill Sets are displayed below. Consider that the possible number of Skill Sets selected by both you and the manager can range from 6 to 12. If you both select the same 6 Skill Sets you will have 100% alignment. When you did not agree on any of the Skill Sets as most critical, there is 0% alignment. As the alignment percentage decreases, it becomes even more important for you and the manager to discuss and clarify the most important aspects of the manager's work. If you each look at different behaviors as most important, then the focus of the manager may be very different from where you expect the focus to be.

Critical Skills Alignment: 50%

- S** **Processes Information:** Gets to the point. Evaluates the pros and cons, as well as the short and long-range consequences, of decisions. Develops logical, clear conclusions.
- B** **Communicates Effectively:** Expresses self clearly, both in writing and in speaking. Is thorough, yet concise, and is consistently straightforward. Readily shares information with others.
- B** **Provides Direction:** Establishes clear expectations and a manageable workload. Plans the steps required to accomplish objectives, while keeping focus on overall vision.
- S** **Delegates Responsibility:** Delegates appropriate jobs to appropriate people. Empowers others to work and solve problems on their own.
- S** **Adjusts to Circumstances:** Can adjust to people's diverse work styles and to varying environments. Deals with setbacks constructively and anticipates change.
- S** **Facilitates Team Success:** Resolves conflicts fairly in a spirit of cooperation. Builds consensus and leads team in setting appropriate goals. Recruits effectively and uses talents of group wisely.
- S** **Achieves Results:** Overcomes obstacles to achieve results that set high standards for others and that positively impact the organization.
- S** **Displays Commitment:** Maintains a high level of energy, perseveres and remains positive.
- B** **Seeks Improvement:** Learns positive lessons from mistakes and constructive criticism. Pursues resources to improve and develop professionally. Sets no limits on personal potential.

Executive Summary

The average rating for each respondent group for the 8 Management Competencies is presented in this section. The numbers shown for **Self** (Sally Sample) and **Boss** (you) are the actual ratings. Note the differences between group ratings, especially where there is a gap indicated (a difference of 1 point or more between groups).

Skill Set Analysis

Any differences between the Critical Skill Sets selected by **Boss** (you) and **Self** (the manager) are of particular interest. Such differences suggest important differences between the expectations of the **Boss** and the focus of the **Self**. They should be a subject of discussion between you and Sally Sample.

Notice the definitions for each Skill Set are provided along with the average score for each group of raters. These average scores for each group and the relationship of each score when compared to the others should be considered carefully. You may see a vertical arrow which will indicate the presence of a gap of 1.5 or more points between two respondent groups.

←→ A Critical Skill Set, according to **Self** or **Boss**, and both **Self** and **Boss** score averages differ by 1.5 points or more.

Respondent Group Comparison

This page presents the relative placement of the average Skill Set score for each of the respondent groups. Each Skill Set is shown with its appropriate Universal Management Competency.

Survey Summary of the 70 items

The ratings for each individual question are shown for easy analysis. Should there be a variance of 3 or more points between groups on a question a flag will appear. Pay close attention to these questions because this wide variance may have had an impact on the average **All Observers** score for that Skill Set.

 **Boss and/or Self did not rate item**

Boss

Leadership

Instills Trust

- 14. Keeps promises
- 15. Can be trusted with confidential information
- 16. Is honest in dealings with others
- 17. Demonstrates high ethical standards

B

Provides Direction

- 18. Makes expectations clear
- 19. Establishes a manageable workload
-  20. Accomplishes long-term objectives by planning incremental steps
- 21. Keeps focus on big picture while implementing details

S B

Delegates Responsibility

- 22. Knows when to delegate and when to take personal responsibility
- 23. Delegates the right jobs to the right people
- 24. Gives others authority to independently fulfill responsibilities
- 25. Empowers others to find creative solutions to problems

Adaptability

S

Adjusts to Circumstances

 **P**

- 26. Is flexible in dealing with people with diverse work styles
- 27. Is comfortable in a variety of environments
- 28. Reacts constructively to setbacks
- 29. Anticipates and plans for changing situations

Thinks Creatively

- 30. Approaches job with imagination and originality
- 31. Inspires innovation in the organization
- 32. Is willing to take bold, calculated risks
- S** 33. Views obstacles as opportunities for creative change

 Boss and/or Self did not rate item

 **Bold Lettering:** Items that fall in a Critical Skill Set, as designated by Self and/or Boss

 **Flags:** Responses lack consensus within respondent group (responses vary by 3 or more points).

Self **All Observers**
Boss

Relationships

Builds Personal Relationships

- 34. Shows consideration for the feelings of others
- 35. Shows absence of prejudicial and stereotypic thinking in words and actions
- 36. Delivers criticism tactfully and constructively
- 37. Maintains composure in high-pressure situations

Facilitates Team Success

-  38. Resolves conflicts fairly
- 39. Creates an atmosphere of team cooperation over competition
- 40. Builds consensus on decisions
- 41. Leads team in formulating goals that complement the organization's mission
- 42. Brings capable people into the group
-  43. Uses the diverse talents and experiences of the group to maximum advantage

Task Management

Works Efficiently

- 44. Applies current technology in practical ways to maximize efficiency
- 45. Makes wise use of outside resources
- 46. Avoids procrastination
- 47. Sets priorities and tackles assignments accordingly

Works Competently

- 48. Demonstrates mastery of fundamentals necessary to the job
- 49. Is skilled at learning and applying new information quickly
- 50. Integrates new theories, trends and methods into appropriate business operations

Boss and/or Self did not rate item

B **S**
Bold Lettering: Items that fall in a Critical Skill Set, as designated by Self and/or Boss

Flags: Responses lack consensus within respondent group (responses vary by 3 or more points).

Self **All Observers**
Boss

Production

Takes Action

- 51. Knows when to stop planning and start implementing
- 52. Takes the initiative to make things happen
- 53. Is assertive in managing problems
- 54. Makes timely, clear-cut firm decisions

S **B**

Achieves Results

- 55. Overcomes obstacles to complete projects successfully
- 56. Effects outcomes that set high standards for others
- 57. Achieves results that have a positive impact on the organization as a whole

Development Of Others

Cultivates Individual Talents

- 58. Is a patient, helpful, effective coach
- 59. Gives others access to training for skill development and professional growth
- 60. Provides objective appraisals of others' strengths and needs
- 61. Maintains a timely schedule for reviews and follow-ups

Motivates Successfully

- 62. Gives recognition to producers of high quality work
- 63. Shows appreciation when others give extra effort
- 64. Shares a contagious enthusiasm that promotes a positive attitude in others

Personal Development

S

Displays Commitment

- 65. Maintains a consistently high energy level
- 66. Persists and perseveres
- 67. Keeps a positive outlook

B

Seeks Improvement

- 68. Admits mistakes and learns from them
- 69. Accepts criticism constructively
- 70. Identifies and pursues resources needed to improve performance

Development Summary Overview

It is good to know how the observers rated the behaviors the manager exhibits on all Skill Sets. Here you will see all 18 Skill Sets with the average of **All Observers'** ratings. Note also the skill sets you and/or Sally Sample identified as critical to success; particularly when a Critical Skill Set is identified as an Area of Focus.

"Areas of Focus" are those behaviors that represent opportunities for enhancing effectiveness. Some Areas of Focus may be listed as strengths because often honing strengths is an excellent way to begin improving skills. Others could fall below the favorable zone and thus present possible limitations observed in the behavior of the manager.

Coaching & Management Considerations

Profiles  International
imagine great people®

Working With Sally Sample

To effectively manage the information provided to Sally Sample in this report we recommend creating a plan to initiate understanding and accountability for expected outcomes. The Individual Development Plan is a tool that is effective in accomplishing this goal.

Leaders follow through on development plans when the leadership need is directly linked to a business challenge or strategy. Think of the Individual Development Plan as any other project or business plan. Design the plan to be realistic, to consist of actions your manager can take every day on the job, and to tie directly to organizational priorities.

Individual Development Plan – Accountability Process

The manager has been tasked with creating an Individual Development Plan (IDP). Your role is to coach Sally Sample on situations related to the IDP, provide feedback, and reinforce acceptable behaviors. Providing this input will help fulfill the intent of the IDP.

First, help the manager identify what they should begin to do differently to improve a skill or behavior, then, have them start doing it. Most often the best course of action for personal and professional growth is obvious and easy to recognize. Next, connect the development of the particular skills to business improvement and agree that the development in these areas is important. Only when they have recognized changes are needed, can they effectively develop an Individual Development Plan. Finally, create the development plan. The IDP need not be complex. The most significant development opportunities take place on the job, so the development process is facilitated as part of current job responsibilities.

To begin this process of growth, we recommend the K-S-S Method which is explained in detail in the **Areas of Focus** section which follows.

Coaching & Management Considerations

These are suggestions which may help you use the information in this report to effectively help the manager grow and develop in the job. Consider these suggestions as you refer to the previous pages.

1. Executive Competency Overview Graph

- Look for Gaps (a difference of 1.0 or more) flagged on the report. Make sure you are aware when and where gaps exist.
- Look at the ratings relative to the Favorable Zone. Pay particular attention to those ratings farthest away from the Favorable Zone.

2. Executive Skill Set Summary

- Note those Skill Sets that are rated below the Favorable Zone. These may need particular attention from the manager.
- Encourage Sally Sample to also further develop those skill sets that are in or above the Favorable Zone.

3. Critical Skills Alignment Summary

- Pay particular attention to those skill sets upon which you and the manager disagreed. These are the skill sets chosen only by you or only by the manager. This suggests a potential difference in expectations between you and Sally Sample.
- Make sure the manager understands your expectations about which critical skill sets should receive the most focus.

4. Executive Summary

- Look again for gaps that exist, especially in the critical skill sets. Any gaps would suggest a discrepancy in the perceptions between those groups of raters.
- Pay particular attention to areas where either your or the manager's rating fell below the Favorable Zone. When the manager's perception differs significantly from other groups Sally Sample needs to look for the reason.

5. Skill Set Analysis

- Check the ratings where both your and the manager's ratings are in the Favorable Zone. This provides an excellent opportunity for recognition. Take particular notice of skill sets marked as "Talent" or "Focus." Talent Skill Sets represent skills to be used and improved. The Skill Sets identified as "Focus" require more immediate attention to enhance performance. In both cases these Skill Sets are critical to the success of Sally Sample.
- Look for those scores farthest below the Favorable Zone as these indicate a definite need for additional training.
- Once again, gaps between the average ratings in one or more groups needs to be understood.
- Look for areas where you rated the manager higher than they rated themselves. These areas of misalignment offer an excellent opportunity to improve communication and understanding between you and Sally Sample.

6. Respondent Group Comparison

- This presentation of the average scores provides a broad view of the differences between respondent groups.

7. Survey Summary of the 70 Items

- Use this section to refer to the actual questions from which the skill set scores were calculated.
- Take notice of a flag in front of any behavior. This identifies a gap of at least 3 points between respondents within a group.
- Review this section before meeting with Sally Sample as it will best prepare you to discuss any areas of disagreement.
- Ensure you and Sally Sample have agreed on clear action steps that have been identified with appropriate timelines.

8. Development Summary Overview

- The Skill Set with the lowest average score requires immediate attention. In addition, two other Skill Sets have been identified as Areas of Focus because it was determined that they were critical to success in this job.

Schedule a follow-up meeting with Sally Sample to discuss progress in personal development, and also schedule the next administration of the Checkpoint 360°.

For your reference,
the remainder of this report was provided to the manager
in the Individual Feedback Report.

This can serve as a foundation for establishing a
Individual Development Plan for Sally Sample.

Areas of Focus

You cannot risk leaving your personal development to chance; planning is essential. How many times have you stated to yourself or others your intentions to act but fall back into old habits? Leaders follow through on development plans when the leadership need is directly linked to a business challenge or pain point. Think of your Individual Development Plan (IDP) as you would any other project or business plan, and design it to be realistic, to consist of actions you can take every day on the job, and to tie directly to organizational priorities.

Developing Your Individual Development Plan

People tend to play to their strengths. So, too, do leaders - choosing to utilize one skill over another due to their personal proficiencies. They have the knowledge and experience to use certain skills in almost any situation. If, as a leader, you don't favor or simply lack proficiency with a skill that is deemed important to your organization, there are two steps you can take immediately to get started in your development. First, if you know what to do differently to improve a skill or behavior, do it! Second, create an Individual Development Plan. Your Development Plan need not be complex. Most often, your best course of action for personal and professional growth and development is obvious and easy to recognize. The most significant development opportunities take place on the job and are totally under your control. To begin this process of growth, you need to use the **K-S-S** Method:

K = actions you should KEEP doing, which are things you already do well. KEEP doing them!

S = actions you should STOP doing. As you analyzed your Feedback Report, you recognized behaviors that bring negative results - this is an indication of something you should STOP doing.

S = actions you should START doing. You have learned things you could be doing to enhance your effectiveness. START doing them at the earliest opportunity. As you add to your knowledge base and acquire ideas for better leadership performance, form the habit of doing them. Make START doing a regular part of your development process.

You can get started on your Individual Development Plan with this simple process:

1. Consider your ratings on the survey behaviors in your Areas of Focus and identify the leadership skills and supporting behaviors that you are going to work on.
2. Review the lists of Challenging Activities for the supporting behaviors in your Areas of Focus which are included on the following pages.
3. Then, using the **K-S-S** Model, identify those actions appropriate to **Keep** doing, actions to **Stop** doing, or actions to **Start** doing.

Area of Focus: Delegating Responsibility

Knowing When to Delegate and When to Take Responsibility

Skills, Behaviors and Attitudes to Adapt and Practice

- Failing to delegate communicates your lack of confidence in your direct reports' abilities. Delegate to the lowest possible level.
- Accept the fact that others can handle some tasks as capably as you can - maybe even better.
- Share responsibility and accountability for delegated work.
- Delegate important tasks you do not have time to do thoroughly.
- Remember, each time you perform a task someone else can, you keep yourself from doing a task that only you can do.
- Prepare your direct reports for delegation. Be sure your direct reports know that it is an expectation of their job to accept and commit to delegated tasks.

Challenging Activities

- In two columns, separate responsibilities that you must retain from activities that you can delegate to others. Review and ask yourself if you are holding onto unnecessary tasks that you can delegate.
- List the names of two or three direct reports. Next to their names, write an assignment you could delegate to them as well as the results you expect from this delegation.
- For a month, ask your direct reports to make a list of the opportunities you missed to delegate to them. Analyze each incident and ask yourself, "To whom could I have delegated that responsibility? What prevented me from doing so? What was the cost to me, my team, my manager, my organization, and our customers when I didn't take that opportunity to delegate responsibility?"

Delegating the Right Jobs to the Right People

Skills, Behaviors and Attitudes to Adapt and Practice

- Match your direct reports' strengths with work assignments.
- Consider a direct report's workload when delegating; shift responsibilities as necessary.
- Provide enough direction and assistance when delegating. Set your direct reports up for success. If in doubt, ask them to explain in their own words their authority, accountability, and responsibility for the delegated task. Then, ask them what they need to complete the assignment.
- Present small, challenging tasks to direct reports with untested abilities. Use this as a springboard to larger assignments. Fill in obvious skill gaps with training and development.
- Provide opportunities for practice if you know a direct report is trying to improve a skill.
- Discuss follow-up with your direct reports when delegating tasks. Make time to meet with your direct reports to review progress on assignments - do not accept that no news is good news.

Challenging Activities

- Survey your direct reports to see what tasks or responsibilities they are interested in tackling.
- In order to balance the work equally, ask your direct reports to list their job responsibilities and workload. In doing so, you can quickly learn the scope of different direct reports' jobs and have a good understanding of your capacity to delegate assignments within your work unit.
- Perform a skill survey of your direct reports. Discover their unused or untapped talents and abilities. Discuss using their untapped talents or abilities more effectively.

Giving Others Authority to Independently Fulfill Job Responsibilities

Skills, Behaviors and Attitudes to Adapt and Practice

- Give as much direction as necessary to orientate your direct reports to new duties - then, let them take charge. Do not hover. During periodic follow-ups, give additional direction as needed. Give them maximum authority, accountability, and responsibility for the delegated task. Allow them to structure the tasks and make the decisions.
- Clarify which actions require prior approval from you. Gradually increase the direct report's authority to act independently.
- Shield direct reports in newly delegated positions from disastrous mistakes; allow the opportunity for smaller errors to be learning experiences. Remember, mistakes are great teachers.
- Never abandon a direct report after delegating. Instead, increase your communications - spend time with the direct report and provide additional skill-building if required.
- When delegated assignments do not meet your expectations, do not redo it yourself. Show your direct report what is to be changed and allow him/her to do the rework.

Challenging Activities

- Identify times in the past three months when you intervened in a project or assignment without permission of the delegate. List the reasons you chose to intervene. Determine the impact of your actions. Identify what you would do differently when delegating to avoid intervening in the future.
- Over the next month, ask others to make a list of the number of times you fail to empower them with the authority to make a decision, solve a problem, or complete a task. Analyze each incident and ask yourself, "Why did I second guess their decision or hamper their authority? What could I have done differently when or after I delegated the assignment?" If your analysis reveals a pattern, make an effort to curb your tendency to improperly empower your employees in those situations.

Empowering Others to Find Creative Solutions to Problems

Skills, Behaviors and Attitudes to Adapt and Practice

- Empowering others to take ownership of creating solutions requires more change by the leader than by his/her direct reports, but do not be surprised if your direct reports resist empowerment.
- Develop a habit to never accept a single solution. Train your direct reports to understand that when they meet with you, they should present at least two ways to solve a problem.
- Do you ask yourself, "What can my direct reports do for me?" Or do you say, "What can I do for my direct reports?" The first statement reflects a leader with a user mentality and the second statement reflects a leader with a developer mentality.

Challenging Activities

- Work with your direct reports and solve problems together, thus reinforcing their problem-solving and collaboration skills. Meet with your team to lead them through a process to creatively solve a problem. Assess lessons learned and work with your team to apply what they learn to the job.
- Advocate *collaboration* and *creative problem solving* as "rules of conduct" on your team/among your direct reports.

Area of Focus: Facilitating Team Success

Resolving Conflict Fairly

Skills, Behaviors and Attitudes to Adapt and Practice

- Conflict situations should be approached as opportunities to strengthen interpersonal relationships.
- Listen carefully to all viewpoints in a disagreement. Define the problem. Restate positions held by those on both sides of a conflict to ensure that the conflict is not just a misunderstanding and to show that you understand the others' perspective. Then, begin the resolution process.
- If a conflict escalates, call for a time out. Reconvene when both parties have calmed to a productive level and have regained their perspective.

Challenging Activities

- When a conflict requires your intervention: 1) Help define the problem in specific, observable terms. 2) Ensure that each person listens to the other. 3) Help them identify areas of agreement. 4) Have them brainstorm alternative approaches and possible solutions. 5) Create a problem-resolution plan. 6) Arrange for progress meetings.

Creating an Atmosphere of Team Cooperation over Competition

Skills, Behaviors and Attitudes to Adapt and Practice

- When recognizing outstanding performance, go beyond the acknowledgment of individual success. Give equal emphasis to team achievements and effective cooperation among teams. Validate the importance of every team member's contribution.
- Encourage cooperation, rather than competition. Make sure direct reports set their goals in harmony with one another and that the goals are mutually supportive.
- Help team members understand one another better by sharing information on the work they are doing. Discuss work histories, specific skills, successes, and talents. Help team members understand, appreciate, and use differences among themselves to perform better work.
- Give feedback to those direct reports that you see devaluing other members of the team.

Building Consensus on Decisions

Skills, Behaviors and Attitudes to Adapt and Practice

- Strive for consensus in order to increase commitment to the final decision. Gain support for decisions by involving the team in considering alternate approaches.
- When selecting people to attend decision-making meetings, make sure all pertinent groups are represented - ask, "Do we need anyone else in this meeting before we proceed?"
- Everyone in the group who is helping to come to a consensus on a decision should have the same level of information and should put all assumptions on the table.
- Practice the art of compromise when making decisions, creating win/win situations.

Challenging Activities

- Keep this checklist before you when leading a consensus decision-making meeting. You cannot say you have reached consensus until you can check each statement.
 - The agreement (decision, solution or plan) meets or exceeds your needs
 - The agreement meets or exceeds the other team members' individual needs
 - The agreement addresses the reason for getting together in the first place
 - Everyone on the consensus decision-making team will support the agreement

Leading Team in Formulating Goals that Complement the Organization's Mission

Skills, Behaviors and Attitudes to Adapt and Practice

- As much as possible, involve the team in formulating goals consistent with, and supportive of, the overall mission of your organization. Active participation by your direct reports in goal setting produces an ownership element that reflects a commitment to achieve the goals they write.
- Assure that written goals contain action verbs and measurable outcomes, as well as specific dates, times, cost, and resource constraints.
- Make sure everyone understands the teams' goals, as well as their role in attaining the goals.
- To ensure goal achievement, you must implement the goal, monitor progress at specific intervals and, as necessary, revise the goal objectives. Keep everyone informed of team progress.

Challenging Activities

- Ask your Human Resources professional to assist you in training your work unit on basic goal setting. If you are an effective trainer, facilitate an in-house training event or request an outside source. Before training, learn as much as you can about your organization's goals and mission.

Bringing Capable People into the Group

Skills, Behaviors and Attitudes to Adapt and Practice

- Review your strategic plan and your work unit's future challenges. Analyze the mix of people on your team and identify missing skills. Recruit individuals with skills that complement your team.
- Know the job for which you are hiring. Do a complete job analysis to gain a clear picture of the experience and skills required for each position.
- Identify direct reports who are successful in your organization and hire new people with similar characteristics and work ethics.
- Do not hire people in your own image - it results in a team with limited skill sets and points of view. Don't be afraid to hire someone more intelligent or even more talented than you.

Challenging Activities

- Analyze your team to see how well you have filled positions in the past. Identify people who seemed to be poor matches (resignations, terminations, poor performance, absenteeism, excessive conflict, etc.). Review the situations that signal a poor match and look for the reason (missing skills, personal style, lack of motivation, etc.). Look for a pattern. Determine reasons for the poor matches (selection/placement procedures, poor interviewing skills, using gut-feelings, etc.)?

Using the Diverse Talents and Experiences of the Group to Maximum Advantage**Skills, Behaviors and Attitudes to Adapt and Practice**

- Capitalize on each person's strengths and experiences to create a potent team effort.
- Be willing to take the ideas of your people to the next organizational level and support their ideas enthusiastically. Give credit where credit is due.
- Assign direct reports possessing the required skills to perform new tasks for greater efficiency.
- Be aware that a fall in personal productivity may indicate that a direct report is not being challenged. Keep a constant check that you are providing every person in your work unit the opportunity to apply all of their skills and talents to their job.

Challenging Activities

- You first learned of your direct reports' talents and experiences through your hiring process. Refresh your memory by reviewing their resumes and applications to be sure you are using their diverse talents and experiences to maximize performance in your work unit.

Area of Focus: Achieving Results

Overcoming Obstacles to Complete Projects Successfully

Skills, Behaviors, and Attitudes to Adapt and Practice

- Remember that obstacles are opportunities to help build your leadership skills.
- When you see a need or problem that you wish someone would address, ask yourself if you could be doing something about it.
- Identify the obstacles that are impeding your progress on a project and develop plans for action to overcome them.
- Consider that when something is not working, you may need to develop another approach. Determine who can help you look at the issue objectively and brainstorm possible solutions.
- Pull your work unit together as a group to solve problems. Use your direct reports as sounding boards in areas where they have expertise. Avoid premature judgment of others' ideas.
- Identifying risk areas in the initial stages of planning is one way you can anticipate and prepare for potential problems. Prevent problems by analyzing their cause.
- Look for new technology that can increase your work unit's efficiency.
- Use humor to keep difficulties in perspective.

Challenging Activities

- When an obstacle hinders the successful completion of a project, gather your team together, getting input from everyone involved in the project and brainstorm about the causes for the obstacle and possible solutions. Create a table with the following columns to help you arrive at a solution:
 - Obstacle
 - List the probable causes for this obstacle and rate them for probability (A - Z with A being high probability).
 - List five suggestions for a solution. Rate these suggestions (1 - 5 with 1 being most probable solution).
 - What are the steps for implementing the solution?

Effecting Outcomes that Set High Standards for Others

Skills, Behaviors, and Attitudes to Adapt and Practice

- Set high standards for performance in every aspect of the business.
- Work to exceed customer expectations.
- Involve everyone in the commitment to quality. Make sure they understand that excellence is good business.

- Constantly evaluate the quality of work produced. Report on both your successes and failures with equal candor.
- Solicit suggestions from your direct reports, manager and peers.
- No matter how well things are going, realize that improvements are always possible. Invite your direct reports to challenge established boundaries. Help them identify "stretch" objectives to achieve organizational goals.
- Follow issues to completion. Persisting at problem-solving sends a strong message that you want issues resolved as quickly as possible and that you are willing to do what is necessary to bring problems to closure.

Challenging Activities

- Determine if your organization uses an effective performance review process that links feedback and coaching to specific business goals. If not, create an active performance review process to reinforce high performance standards specific to your work unit.
- Ask your direct reports to evaluate the standards of the team in these areas (1 = low; 5 = high): Clarity of purpose, communication, problem-solving, decision-making, change, customer focus, quality of work, conflict resolution, work processes, and feedback. For those ratings that are below 3, determine actions that will improve standards in those areas.

Achieving Results that Have a Positive Impact on the Organization

Skills, Behaviors, and Attitudes to Adapt and Practice

- Concentrate your efforts toward achievements that contribute to the team goals and to the mission of the company. Don't get sidetracked with unimportant activities. Lead with a sense of purpose and make sure everyone is aware of the vision.
- If you tend to push your decision-making responsibilities toward your manager, get into the habit of presenting recommendations rather than problems.
- Ensure that everyone who is responsible for meeting the stated financial goals understands what these goals are and what they are expected to deliver.
- Look for customer needs that you could be meeting but currently are not. Develop a plan for meeting these needs with additional or expanded products and services.
- Accept that you may sometimes need to work across departments to achieve goals. Build positive relationships outside your department that will enhance cooperation.
- Become more cost-conscious. Ask others to justify expenditures and look for ways to cut costs.
- Develop a company-wide definition of quality and manage to that definition.

Challenging Activities

- Groom your direct reports to speak for and represent your work unit in company-wide meetings. Rotate this assignment if possible. Giving them the opportunity to talk about their work and hear from others is an excellent way for them to see how their work fits into the overall picture.
- Review your own and your direct reports' individual development plans and performance appraisal criteria to ensure that they are consistent with the organization's top priorities.
- Know the business of your organization by investigating the following. You will need internal resources to gain this information.
- The history of your organization, its strengths and weaknesses
- The organization's key success factors
- Obtain copies of the organization's vision and mission statements and communicate these to your direct reports
- Study your organization's annual report
- Learn to interpret your organization's financial system
- Understand the organization's competition
- What does the organization do to maintain morale? Rewards? Recognition?
- Obtain your organization's written code of ethics, if available
